FRUITS For TABLE and COMMERCE

1927

A List of Citrus, Deciduous and Semi-Tropical Fruit Trees

Edward H. Rust Nurseryman
1625 Bank Street, South Pasadena, Calif.

APPLES

Note: Our trees this year are unusually large and of very fine quality.

Rome Beauty. Large; yellow striped with bright red; very handsome; flesh tender, juicy sprightly. December to February. 75c each.

Bellefleur. Very large; oblong, skin smooth, pale lemon yellow, often with blush next the sun; flesh tender, juicy, crisp, with a sprightly sub-acid flavor; one of the very best. October to January. 75c each.

Delicious. Large; ribbed and irregular; dark red where apples color well. A long keeper and of remarkably high quality in favorable location. 75c each.

Jonathan. Medium to large; conical; striped, mostly red; tender, juicy, rich vinous flavor; very productive; good keeper, one of the best varieties either for table or market. October to November. 75c each.

Winter Banana. Medium to large; golden yellow, usually shaded crimson; flesh fine grained with very rich, sub-acid flavor. Tree healthy and vigorous. Commences bearing very young. 75c each.

W. W. Pearmain. Large, roundish; very smooth and nearly white; favorite market sort. November. 75c each.

Newton Pippin. Large, yellow with brownish red cheek; firm crisp, juicy, with a very rich, high flavor. Generally considered the best winter apple in California. December to March. 75c each.

Red Astrachan. Large and handsome, nearly covered with deep crimson. Juicy and crisp, with rich acid flavor; very productive; does well in valley situations. July. 75c each.

APRICOTS

Blenheim. Above medium; oval, orange, flesh deep yellow, juicy and fairly rich; vigorous grower and regular, prolific bearer. 75c each.

Newcastle. Medium size, round, pale orange in color. The earliest apricot to ripen. May. 75c each.

Royal. A standard variety; skins dull yellow, with an orange cheek; flesh pale orange, firm and juicy, with a rich, vinous flavor; equally valuable for canning and drying. July. 75c each.

ALMONDS

Nonpareil. Of a weeping style of growth, but still forms a beautiful tree; an extraordinary heavy and regular bearer, with very thin shell. 75c each.

Texas Prolific. Nut medium size; shells perfect and well filled. As the name indicates, this is a very heavy and regular bearer. It is of the greatest value for planting with other sorts to increase their yield by aiding pollination. Tree is a fine, strong grower. 75c each.

Ne Plus Ultra. The tree is a vigorous grower, very productive; nuts large. One of the best. 75c each.

CHERRIES

Black Tartarian. Largest size; bright purplish black, flesh purplish, thick, juicy, very rich and delicious; tree a remarkably vigorous, erect and beautiful grower; the best of

black cherries. 75c each.

English Morello. Large; dark red, nearly black, tender, juicy, rich acid; productive and late. 75c each.

Royal Ann. Pale yellow; richly mottled with red; large to extra large; very firm, juicy and sweet; good eating and magnificent for display and a good shipper. Canned they have no equal. 75c each.

Bing. Large dark brown or black. Very firm. Late, vigorous grower with heavy foliage. July. 75c each.

CRABAPPLES

Transcendent. A beautiful variety of the Siberian Crab; large, red and yellow; tree a remarkably strong grower. 75c each.

Hyslop. Fruit of large size, deep crimson, of fine quality. Tree remarkably vigorous. 75c each.

FIGS

Black Spanish. One of the leading California Black Figs. Similar to Mission but larger. Good quality fruit. Tree a strong upright grower. 75c and \$1.25.

Brown Turkey. Fruit very large and handsome. Turbinate, skin smooth, pulp rosy red, quality good, ripens early. 75c and \$1.25.

Kadota. The best of all figs for home use. Medium size; skin thin, yellowish-green, flesh light yellow, of excellent quality, rich and sweet. As it ripens a honey drop forms on the blossom end which excludes insects, thereby preventing any infection. Does not crack or sour when ripe; dries perfectly. August to November. 75c and \$1.25.

Black Mission. The well known California Black Fig. The tree is a strong grower and a heavy bearer. 75c and \$1.25.

NECTARINES

Gower. Earliest of all Nectarines. Ripens with Early Crawford Peach. Fruit is firm, freestone. Very early; delicious flavor. Strong grower. 75c each.

New White. Rather large; nearly round. Skin white with a light tinge of red when exposed, flesh white, tender and very juicy, with a rich vinous flavor. August. 75c each.

Boston. Large, bright yellow with red cheek. Flesh yellow, sweet and pleasant flavor. Freestone. August. 75c each.

Hardwicke. Very large, almost round; skin pale green on the shaded side, entirely covered with dark pulplish red next the sun; flesh greenish, melting, juicy, rich and highly flavored; a most delicious fruit and regular bearer; freestone. 75c each.

PEACHES

Lovell. A California seedling; large, almost perfectly round, flesh clear yellow to the pit, firm and of excellent quality; a superb canning peach and dries well. Very prolific. August. 75c each.

Foster. Very large; yellow with red cheek. Much like Early Crawford but is larger, earlier and better. Runs very uniform in size. A thoroughly fine yellow freestone. July. 75c each.

J. H. Hale. A peach of nation-wide fame. Ripens immediately after Elberta. A very large, handsome peach; delicious and juicy, beautiful yellow color, covered with bright red; practically no fuzz. Flesh solid and excellent shipper. August. 75c each.

Elberta. Very large, unusually elongated, skin golden yellow, where exposed to the sun. Faintly striped with red; flesh yellow, very fine grain, juicy, rich, sweet and splendidly flavored. Tree very prolific and presents a handsome appearance. August. 75c each.

Orange Cling. Fruit very large, yellow, with dark crimson cheek, rich, sugary and vinous flavor. July. 75c each.

Lemon Cling. Large, lemon-shaped, yellow, flesh firm, yellow and slightly red at pit; flavor rich, sprightly, vinous and sub-acid. Mid-season. 75c each.

George The Fourth. Large, white with red cheek; flesh white, juicy and extremely rich, tree vigorous and bears moderate crops of the best quality. One of the best whites for home use. Medium. July 15th.....75c each.

Late Crawford. Fruit very large, roundish; skin yellow, with dark red cheek, flesh deep yellow, juicy and melting, with a very rich and excellent vinous flavor. Late August. 75c each.

McClure's Cling or Strawberry Cling. The best white cling for home use. Fruit large and oval; skin yellowish and splashed with red; flesh firm and creamy. Fine flavor. September. 75c each.

Salway. Large, yellow with crimson cheek; flesh deep yellow, very juicy, melting and rich. The most valuable late variety. September 20. 75c each.

Early Crawford. A magnificent, large yellow peach of good quality. Its size, beauty and productiveness make it one of the most popular varieties both for home use and commercial planting. August 1st. 75c each.

Heath's Cling. A most delicious cling; very large; skin downy, creamy white, with faint blush of red; flesh white, slightly red at the pit. Very tender, juicy and sweet, valuable for canning. September. 75c each.

Phillip's Cling. A fine, large, yellow cling, clear yellow to the pit, which is very small; flesh yellow and fine grained. Tree thrifty and regularly productive; preferred by canners to any other late variety of Cling. August to September. 75c each.

Belle October. Large, yellow freestone of excellent quality, somewhat resembling the Salway, being more juicy and two or three weeks later, making it one of the best late peaches. 75c each.

Sim's Cling. Known as an improved Phillip's cling. Fruit averages large; golden yellow, with blush on exposed side. Flesh deep yellow to pit which is small. One of the best clings. 75c each.

Champion. A large medium early variety; creamy white with red cheek. Rich, juicy and productive. Late July. 75c each.

Saucer. One of the popular earlier varieties. Fruit medium size and flat. Juicy and of good quality. 75c each.

Miller's Late. It is a fine yellow freestone, of the Salway type, being of better flavor and quality. Heavy bearer. November.....75c each.

PEARS

Winter Nellis. Medium size; dull russet, melting, juicy, buttery and of the highest flavor. Does not bear regularly in some sections. December to January. 75c each.

Seckle. Rather small; regularly formed, yellow with russet red cheek, flesh cream color, flavor rich, spicy. Excels all other sorts in quality. September. 75c each.

Bartlett. Large, smooth, clear yellow; flesh white, juicy, buttery and highly perfumed. The most popular sort in this state; the best early variety and has no competitor for market or canning. August.....75c each.

Wilder Sugar. A fruit of excellent quality, juicy and very sweet. One of the best as fresh fruit. August. 75c each.

Flemish Beauty. A large sweet pear, strong grower and fruitful; an old standard autumn variety. September. 75c each.

Keiffer. Large, skin golden yellow, often tinted with red on one side. Flesh juicy and melting with pronounced quince flavor. 75c each.

PERSIMMONS

Hachiya. Very large, oblong, with short point; very showy, skin bright dark red, with occasional dark spots or blotches and rings at the apex, flesh deep yellow, with seed. Astringent until ripe; then very fine. The largest and handsomest of all. Tree vigorous and shapely. 75c and \$2.00.

PLUMS

Satsuma. Fruit large, nearly round; dark red, solid color from skin to pit; firm, rather juicy, fair flavor, pit very small. Extremely productive. Late July and August. 75c each.

Duarte. Often called the Improved Satsuma. Fruit more egg-shaped but less acid. July. 75c each.

Burbank. Large, rich cherry red, slightly mottled with yellow; flesh deep yellow, juicy, very sweet when fully ripe, agreeable flavor; tree vigorous grower, bears early and is extremely productive. August. 75c each.

Santa Rosa. Originated by Luther Burbank. Probably the most beautiful plum known. Fruit very regular, oval, large, purplish crimson. Well covered with light blue bloom; very firm, making it an excellent shipper, as it also keeps well. Flesh purplish next to skin, yellow veined, pink toward pit.

Heavy bearer. Extremely early. Unquestionably of very great value. July. 75c each.

Hale. Round, translucent, yellow, juicy, tart at pit. 75c each.

Climax. Originated by Luther Burbank. Very large, heart-shaped, skin thick firm, deep vermillion red, flesh yellow. A superbly rich variety. Ripens middle of July. Vigorous grower and very productive. 75c each.

Kelsey Japan. Very large, greenish yellow, covered with red on the sunny side; flesh very solid and firm when ripe; juicy and with a rich vinous flavor; pit very small. September. 75c each.

Wickson. Originated by Luther Burbank. Very large, yellow; overlaid with glowing carmine with a white, heavy bloom; flesh firm; sugary, delicious, pit small. Remarkable for long keeping. Tree vigorous and upright. August. 75c each.

Apex Plumcot. This fruit, as its name indicates, is a cross between the apricot and the plum, resulting in a satisfactory combination of the two fruits. The large, globular fruit, which comes into bearing with the earliest plums, is beautiful in color, rich, firm and aromatic. June. 75c each.

Blue Damson. Fruit small, oval. Skin purple, flesh melting and juicy. An old well known sort. September. 75c each.

POMEGRANATE

Wonderful....A recent introduction of great merit. Large, highly colored and attractive, pulp a rich garnet. These qualities together with an abundance of juice and an excellent flavor, mark it as the superior variety. October. 75c each.

PRUNES

French. The well known variety so extensively planted for drying; medium size, egg-shaped, violet purple, juicy, very sweet, rich and sugary; very prolific. August. 75c each.

Hungarian. Very large, dark red, juicy and sweet. Its large size, bright color, productiveness and shipping qualities render it a profitable variety for home or distant market. August. 75c each.

Sugar. Extremely early, very large; ripens August 1st, cures superbly rich, with a yellow flesh, tender and rich in sugar; skin very tender, at first a light purple, tinted with green, changing at maturity to dark purple covered with a thick white bloom. Contains almost 23 per cent sugar. Tree an unusually vigorous grower and very productive. 75c each.

Tragedy. Medium size, skin dark purple, flesh yellowish green; very rich and sweet, freestone. June. 75c each.

QUINCE

Orange. Large, golden yellow, with firm flesh and excellent flavor. A strong growing and thrifty variety; one of the best for preserves, as it cooks very tender. 75c each.

Pineapple. Fruits very large, apple-shaped, clear yellow; flesh very tender, can be eaten raw like an apple, makes a high-flavored jelly. It is said that it will cook tender in five minutes. Its flavor is delicious, same as that of a pineapple. 75c each.

Van Dieman. One of the best of the Quinces, flesh tender and always cooks soft. 75c each.

WALNUTS

Placentia Perfection. A selected variety of Santa Barbara. Soft shell. Nuts are all of large size and perfect shape, with smooth, soft, thin shell; kernel white and sweet. 10-12 feet, \$2.00; 8-10 feet, \$1.50; 6-8 feet, \$1.25.

Eureka. Tree remarkably vigorous; upright grower, leaves and blooms three weeks later than seedlings of the Santa Barbara soft shell. Nuts large, elongated, smooth and tightly sealed. A desirable variety for planting in the interior valleys. Regularly productive. 10-12 feet, \$2.00; 8-10 feet, \$1.50; 6-8 feet, \$1.25.

Mayette. One of the most popular varieties grown in the northern walnut districts. Nuts large and uniform; shell light colored; blooms late in the spring and bears abundantly; tree hardy, a standard commercial sort. 10-12 feet, \$2.00; 8-10 feet, \$1.50; 6-8 feet, \$1.25.

Payne's Seedling. A large shapely walnut which has its origin in Campbell, Santa Clara County. First discovered by George C. Payne through whose efforts it has been brought up to its present state of perfection. Bears regularly and heavily. 10-12 feet, \$2.00; 8-10 feet, \$1.50; 6-8 feet, \$1.25.

LEMONS

Eureka Lemon. Tree good grower and comparatively free from thorns; prolific bearer, blooming and setting fruit continuously throughout the year. Fruit shaped oblong and of medium size; flavor of strong citrus quality, juice free and abundant, cures and keeps well. **\$2.25.**

ORANGES

Washington Navel. Fruit large to very large; peel invariably smooth and thick, rendering it of good productive quality; color a pronounced orange yellow; fruit marked at the blossom end with a small but irregular and secondary orange, from which it takes the name of "Navel." Fruit seedless and free from "rag," flesh crisp and sweet, with abundant juice, possessing a flavor peculiarly its own. Tree of a rather moderate growth; in California a strong and regular bearer, often producing fruit the second year in orchard from the nursery rows. **\$2.25.**

Valencia Late. Long fruiting, which extends from May to November. This variety is second only to the Washington Navel in commercial importance. The fruit is medium size, slightly oval; color a good orange yellow, flesh of good grain with abundant juice of fine citrus flavor; peel thin, smooth and of good protective quality; practically seedless. Tree splendid form and of vigorous upright growth, attaining to great size much like the seedling type. **\$2.25.**

St. Michael. Tree strong and vigorous; fruit medium round and heavy; skin thin and smooth, light color; an abundance of juice; flavor sweet and sprightly; ships well. Tree is very productive. Ripens February to June. **\$2.25.**

POMELOS

Marsh's Seedless Grape Fruit. Tree a strong, vigorous, compact grower, grapefruit and not a hybrid; practically seedless, specimens merely rudimentary, seeds being rare; juice abundant and of exceptionally fine flavor; flesh dark and rich. **\$2.25.**

TANGERINES

Dancy Tangerine. Tree strong upright grower, resembling in habit a seedling orange; when bearing heavily has a slight tendency to spread at the top, which can be avoided by proper pruning; unlike most of its family, has a broad leaf, much like the standard oranges; well grown, the tree makes a handsome appearance with its intensely colored fruits. Fruit of medium size; color bright shiny orange red, peel smooth, thin and leathery, being easily removed; flesh dark orange color. **\$2.25.**

KUMQUATS

The whole fruit, rind and all, is eaten and people become very fond of it. Fruit about an inch long and olive- or egg-shaped; color a rich golden yellow. Tree dwarf and bushy in habit, usually when full grown 8 to 12 feet in diameter. **\$2.50.**

AVOCADOS

3-4 feet, \$4.00; 4-5 feet, \$4.50; 5-6 feet, \$5.00; 6-8 feet, \$6.00.

THICK SKINNED

Dickinson. Medium size fruit, averaging 9 to 16 ounces; oval shape. Has a very thick, dark purple skin. Vigorous grower and prolific bearer. Excellent shipper. June to October.

Fuerte. Fruit is pyriform to oblong; medium size, with a smooth green skin which separates readily from the creamy, yellow, buttery flesh. Seed medium, tight in cavity. The hardiest of its type. October to June.

Dutton. Pyriform in shape, average one pound in weight; dark purple with a thick slightly pebbled skin; very rich flavor; an early and heavy bearer. Vigorous grower. February to April.

Linda. One of the largest avocados, averaging 2 pounds; round, with a rough purple skin. The tree has beautiful bronze foliage, but is rather tender. May to October.

Lyon. Early and prolific bearer, usually the second or third year after planting. Fruit large, 16 to 18 ounces; conical in shape, with a rough green skin; very finely flavored. Tree is an upright slender grower. April to July.

Mayapan. Bears young and consistently. Nearly round, averaging 1 pound; brownish purple, with a thick skin, very fine quality. Fruit hangs on well in heavy wind; tree tall and slender. May to August.

Puebla. Exceptionally hardy and vigorous. Flesh has a rich nutty flavor, color cream and buttery in texture. Skin quite thin. Form roundish oval; of medium size; seed medium. December to February.

Spinks. Fruit nearly round; 16 to 20 ounces; purplish black; rough thick skin. Flesh cream colored and of wonderful quality. Seed small. February to November.

Ward. Vigorous grower. Fruit weighs from 12 to 20 ounces. Flesh rich yellow to medium green. Good quality. Skin turns to dark purple; smooth, medium thickness. December to February.

THIN SKINNED

The thin-skinned avocados are the hardiest and weigh from 4 to 10 ounces.

Caliente. A hardy thin skin fruit of excellent quality, quite large. Heavy bearer. September to October.

Ganter. Medium size, form oval to oblong; skin thin of greenish color; flavor and quality excellent. Vigorous, fruiting early. October to December.

GUAVAS

Strawberry Guava. More of a shrub than a tree, rarely attaining a height of more than ten to fifteen feet. Its glossy green leaves make it very attractive as an ornamental plant. Quite hardy and will stand about the same temperature as the orange. Fruit obovate to round in form, being from one to one and one-half inches in diameter, purplish red in color and medium thick skin. The flesh is pink next to the skin, changing to a creamy white in the center and contains a number of small hard seeds. 50c to \$1.50.

Yellow Strawberry Guava. Yellow in color and somewhat larger than the red variety, also has a milder and more delicate flavor. Ripens at the same time. 50c to \$1.50.

Feijoa Budded. The plant never attains a height of more than fifteen to eighteen feet. The leaves are similar in form and appearance to those of the olive, the upper surface being a glossy green and the lower a silver gray. This together with its strikingly handsome flowers makes it a very attractive plant for the garden. The fruit of the improved varieties is from two and a half inches in diameter, of the dull green color over-spread with a whitish bloom. The flavor is pleasing and suggestive of pineapple and strawberry and has an aroma that is delightful and penetrating. The fruit may be eaten fresh as picked from the tree or it may be stewed or made into a jam or jelly. It also makes excellent pies. The Feijoa is hardier than most sub-tropical fruits and will withstand a temperature of 15 degrees above zero with little or no injury. \$2.50.

Cherimoya. The tree is erect but has somewhat of a spreading habit and rarely reaches more than twenty-five feet in height. The fruit is usually heart shaped, but is sometimes irregular in form. It also varies in weight from a few ounces to as high as five pounds, however, the budded or grafted varieties are more regular than others in shape and weight. The surface of the fruit is usually covered with small conical protuberances, is light green in color and has a thin skin making it necessary to handle the ripe fruit very carefully to prevent bruising. The flesh is white and of a melting juicy texture. It has a very delicate sub-acid flavor suggestive of pineapple and banana. When ready to pick, which is from January to April in California, the fruit usually has a yellowish tinge. Under favorable conditions the trees begin to bear the third or fourth year. Budded, \$3.00.

OLIVES

Mission. The variety is found at all the old missions. It is the most common and found in almost every county in the state. Succeeds well under all circumstances with very little care. Fruit medium to large; jet black. Yields fine oil and can also be pickled. Ripens late. \$1.00 to \$7.50.

Manzanillo. Fine large, purplish black. Tree is a free grower of rather spreading habit. Very prolific. October. \$1.00 to \$7.50.

GRAPES

Foreign, Table, Raisin and Wine Grapes

25c each; \$2.50 dozen

Black Monukka. A black seedless grape, rapidly coming into favor. Some larger than the Thompson Seedless, color dark red to black when fully ripe. Quality excellent. Bears well; vine is vigorous grower. Excellent shipping grade. Early August.

Black Hamburg. A fine, tender grape, producing large, compact bunches. Berries coal black when fully ripe; very large and oblong in shape. A great favorite for table and market. September.

Black Malvoise. A good early table grape. Fruit oval, juicy and tender, reddish-black in color. Strong grower. Late August.

Black Morocco. Berries very large, oval; purplish black when ripe; flesh firm, sweet and crisp; bunches medium to large, compact; an excellent late shipping grape. October.

Black Muscat. An excellent table grape; berries very large; skin well colored, thin but tough; flesh soft and juicy with delicate Muscat aroma. Decidedly the richest flavored of all the table grapes we grow. We recommend it especially for home gardens. August to September.

Gros. Colman. Berries of this variety are as large as small plums, and are borne in immense clusters. Skin thin, very dark and covered with bloom; flesh firm, pleasant flavor. A very excellent table variety. October.

Cornichon. Bunches long and loose, berries oval; skin thick; covered with bloom; firm, good quality; one of the best late shipping grapes. October.

Emperor. Bunches large, long and rather loose; berry large; oblate, wine colored, very firm; a very late variety, and considered one of the best for shipping. October.

Malaga. One of the best table grapes; vine a strong grower, and very productive; bunches very large, compact; berry large, oval, yellowish-green. August.

Muscat. The white raisin grape planted so extensively in California; bunches large and loose; berry oval; Muscat flavor, one of the richest flavored of all grapes; valuable for raisins and table. September.

Sultana. Berries small, round, firm and crisp; golden yellow and without seeds; bunches very large and long. Vine vigorous grower and prolific bearer; largely planted for seedless raisins and table fruit. August.

Thompson Seedless. Oval, greenish-yellow; as large or larger than Sultana; seedless; thin skinned; good, but not strong flavor; bunches very large. Valuable for either table use or seedless raisins. Profitable early shipping variety. July.

Mission. Berries medium, round, black, sweet. An old standard wine grape. August.

Purple Damascus. Fruit is very large. Deep purple. Flesh meaty, bunches large, very desirable for table use. September.

Flame Tokay. Bunches very large, pale red, flesh firm and sweet. September.

Zinfandel. Bunches large and compact. One of the wine grapes.

Dattier de Byrouth. A recently introduced table and raisin grape of very fine quality. Very large, elongated oval, amber colored berries of the most exquisite flavor, borne in large, loose bunches, which handle and ship well. September.

Rose of Peru. Large, brownish black; flesh tender, juicy and rich. Strong grower. Bears well. September.

HARDY AMERICAN GRAPES, 35c EACH, \$3.50 DOZ.

Concord. Undoubtedly the most widely known and popular of all the American grapes. The vine is a healthy vigorous grower, and being hardy, it succeeds where the more tender foreign varieties fail. Color black, covered with bluish bloom. August.

Delaware. Bunches are small and compact; berries small; light red with a violet bloom; sweet, sugary and vinous with musky aroma. August.

Niagara. Fruit large; bunch medium, compact; skin thin but tough, pale yellow with whitish bloom; flesh tender and sweet; vine healthy and productive; ripens with Concord. Considered the best hardy white grape in cultivation. August.

Pierce. (California Concord). Extremely large, sweet and of extraordinary quality; berries bluish-black; vine of vigorous growth and very prolific; an esteemed market variety. August.

Isabella. Berries large, round, dark purple. Sweet and rich.

BLACKBERRIES

Cory Mammoth Thornless. The big luscious berries often grow to a length of $2\frac{1}{2}$ inches, have a small core, are almost seedless and the distinctive flavor is suggestive of the wild berry. They are richer and sweeter than other blackberries, yet have sufficient acidity to make the finest of jelly. The vigorous canes grow erect to a height of about five feet then

assume a trailing habit, making a growth of 25 feet or more, and properly cared for gives enormous yields through a long season, thrives in any good soil and will amply repay special culture and fertilization. 20c each; \$2.00 dozen.

Mammoth. This new variety was raised by Judge Logan of Santa Cruz, and is thought to be a cross between the California wild blackberry and the Crandall's early. It is a very rampant grower, trailing on the ground. Foliage is large, thick and of a deep green color. Fruit of the largest size and ripens early. In size and flavor it is said to surpass all other varieties of blackberries. 15c each; \$1.50 dozen.

Crandall's Early. Large, firm and very good flavor; it ripens fully two weeks before any other sort, and continues to bear through the whole blackberry season. 15c each; \$1.50 dozen.

Himalaya. A rampant grower, the canes often growing to 40 feet in one season; a prolific bearer, the fruit having but few seeds. 15c each; \$1.50 dozen.

LOGANBERRY

Vine an exceedingly strong grower; trails upon the ground like a dewberry, but should be grown on a trellis; fruit is often an inch and a quarter long, dark red, with the shape of a blackberry, the color of a raspberry and the flavor of a combination of both; a splendid shipper. Now widely known and deservedly popular. 20c each; \$2.00 dozen.

RASPBERRIES

St. Regis. Everbearing. Bright crimson, firm, rich, delicious flavor. 15c each; \$1.50 dozen.

Cuthbert. An old favorite; large and handsome; bears transportation well; very productive. 15c each; \$1.50 dozen.

Columbia. Strong, vigorous grower; berries size of Gregg; of better color, jet black, firm and of best quality. 20c each; \$2.00 dozen.

La France. Giant everbearing red raspberry. Big, rich, sweet, juicy berries from June until November. This new raspberry has been thoroughly tested and proves to be all that is claimed for it. 25c each; \$2.50 dozen.

STRAWBERRIES

40c per doz.; \$2.00 per 100

Carolina. The new strawberry for California. Very early and will bear a crop 8 to 12 weeks after transplanting. A continuous bearer of the large red berries and does better in California than the so-called everbearing varieties.

Klondike. For many years the Klondike has been the favorite with large growers. It is excellent for shipping. Very uniform, rich blood red, juicy and of delicious flavor; medium early.

Brandywine. Large, roundish, conical; bright red; flesh firm and of rich flavor. It is a good shipping variety.

Progressive. Everbearing. Comes nearer bearing continuously than any other variety we know. Foliage strong and healthy. Bears first year from spring set plants. Berries medium size; color deep red inside and out; firm; quality rich and sweet.

Champion. Everbearing, one of the late introductions in the everbearing strawberries. Fine quality and good flavor. 50c dozen; \$2.00 per 100.

ASPARAGUS

Palmetto. A new variety of Southern origin, and reports indicate that it is equally adapted for all sections. It is earlier, a better yielder, more even and regular in its growth and quality equal to that old favorite, Conover's Colossal. 50c dozen; \$2.50 per 100.

Mary Washington. The best of a new race of asparagus originated through hybridizing by experts of the Dept. of Agriculture. Extra large, productive and rust resistant. 50c dozen; \$2.50 per 100.

RHUBARB

Wagner's Giant. A superior variety, producing stems twice as large as those of the ordinary Crimson Winter and has been known to yield as high as 20 tons to the acre. It is unsurpassed in flavor. 20c each; \$2.00 dozen.

Panama. For flavor, productiveness and growing quality, it is unsurpassed. 25c each; \$2.50 dozen.

Strawberry. The standard sort; large, thick stems, of excellent flavor and mildly acid. 20c each; \$2.00 dozen.
